## **BACKGROUND**

This user’s manual provides information to facilitate the use of the MEDC scorecard as a management tool by all staff.

## **WHAT IS A SCORECARD?**

A scorecard is:

- A management tool for monitoring the performance of an organization and evaluating opportunities
- A set of few vital and balanced measures that reflect the ultimate value the organization delivers
- A group of key outcomes that can be controlled or directly influenced by the organization
- *Not a dashboard that provides a broader status of the environment that the scorecard operates in\**

\* e.g., statewide unemployment rate (dashboard) vs. projected jobs created as a result of MEDC-managed programs (scorecard)
